

CCTVs

What are CCTVs?

CCTVs stands for Closed Circuit Television. CCTVs are security/surveillance systems comprised of cameras, recorders and monitoring displays.

Who is using it?

Law enforcement, financial institutions, government facilities, shopping centers and more.

Why is it being used?

- Monitor multiple locations in real time
- Identify threats and deploy appropriate response

A warm, happy, November on behalf of GSG!

The holidays are among us and we wanted to take a quick minute to remind everyone of a memo sent out September 1, 2018 announcing GSGPS's annual blackout time from November 12 - January 6, 2019.

During this time, no time off requests will be approved and attendance will be closely monitored. Unfortunately, the holiday season is a time that makes many businesses more vulnerable and security is of the utmost importance.

Please feel free to contact your respected offices for any additional questions.

EMPLOYEE RECOGNITIONS
