

# REMOTE MANAGED SECURITY DIRECTOR

Security directors bring a world of expertise with their years of security, law enforcement and/or military backgrounds.

With tightening budgets, having an onsite security director may be costly, GSG offers a **Remote Managed Security Director Program (RMSD)** to offset the cost of having an onsite director, while still providing your organization with comprehensive security programs, policies, and procedures.

The RMSD program will assign a security director to design, implement, monitor and maintain comprehensive security and risk management programs for your organization.

## Benefits

### Cost Savings

- Fraction of the cost of an onsite director, same high quality
- Save on recruiting & relocation fees
- GSG as your total security provider: package programs, streamline tasks/communication

### Time

- Save time hiring & vetting: average time to hire a security director is 6 months
- Evaluate/implement security programs faster
- Maintain your security plan without interruption

### Focus

- Ability to focus on your organization's day-to-day tasks
- GSG is available 24/7 & is in multiple locations

## WAYS SECURITY DIRECTORS CAN HELP:

- Collaborate with executive management
- Conduct audits
- Create global security policies
- Develop high level security objectives, plans and goals
- Enact policies & procedures in all areas of security, including:
  - Emergency action plans
  - Emergency policies for active shooters, natural disasters, power outages, etc.
  - Employee & 3rd party safety
  - General policies & procedures
  - Intellectual property & security policies
  - IT network security, access control, password policies, network monitoring, etc
  - Physical security measures
  - Privacy policies
  - Vet new hires & vendors
  - Workplace violence and prevention
- Establish security initiatives & standards
- Evaluate, recommend, monitor and update video surveillance systems and access control systems
- Identify, vet, monitor & oversee security related vendors
- Investigate and prevent security breaches
- Maintain relationships with local, state and federal law enforcement and other related government agencies
- Monitor, maintain and update security practices as needed
- Risk assessments & security surveys
